Commands for Installation

1. Execute the following command to install Jenkins

```
#sudo wget -O /etc/yum.repos.d/jenkins.repo http://pkg.jenkins-ci.org/redhat/jenkins.repo
```

```
#sudo rpm --import http://pkg.jenkins-ci.org/redhat/jenkins-ci.org.key
```

```
#sudo yum install Jenkins
```

2. To start Jenkins Server

```
#sudo /etc/init.d/jenkins start
```

3. To install Puppet

```
#yum install puppet
```

4. Opening the conf file to add the puppet server hostname

```
#vim /etc/puppet/puppet.conf
```

5. To install HAProxy

```
#yum install haproxy
```

6. To configure HAProxy

```
#vim /etc/haproxy/haproxy.cfg
```
